Subject: Notes from the last few days and for next week

Hi All,

I'm about to go on annual leave until August 24. I'll keep my phone with me but not my computer. Have a great weekend and week! Talk to you all on August 24!

Notes:

Superfund - I sent an email about the One EPA Web Superfund project.

One EPA Request to HQ - Patti has prepared our request for transferring pages to W3. It needs to go out from Serena. Bill, could you help shepherd this through to have it sent from Serena? Thank you.

Marine Debris - The Marine Debris team is very actively developing content and will work with Patti next week on starting the draft in Drupal.

Media Center - I think this is ready to go to HQ for review. I asked Trish to send it.

Gold King Mine - I helped out a bit with suggestions for this Web page. It was a rather tortured process, understandably. I think it is a good page even though not all of our suggestions were incorporated.

Newsletter - August newsletter is in rough draft. Trish, if you could find events next week, we can add those in and the final content to send the newsletter during the week of August 24. I had hoped to have it final by this week but it was just too crazy. Plus, we want to include Gold King

Mine in it and it is better to wait on that to see more positive coverage (per Bill K.).

Social Media Outreach - only Gold King Mine until we hear otherwise from Jessica

Social Media on Gold King Mine and Government Employees - We heard that EPA employees should not post on this on personal accounts at all. I informed a few individuals about this after I saw their posts. I suggested to Bill K. that he may want to send a message out about this and I think he is planning to do so.

Red Hill - expecting an update next week... Dean will let us know!
